

FAWAS A M

Software Development Engineer II / Senior Full Stack Developer

+971 565390212 | fawasmundakkottil@gmail.com | linkedin.com/in/fawas-am | github.com/fawasam | fawasam.in

Open to Immediate Relocation to UAE / Dubai / GCC

PROFESSIONAL SUMMARY

Full Stack Backend Software Engineer (SDE II) with 3+ years of experience architecting and delivering high-concurrency web platforms, microservices, and distributed cloud applications across the Middle East (UAE) and India. Proven track record in developing enterprise consumer platforms in UAE e-commerce, logistics, and fintech—including integrations with Middle East payment gateways (PayTabs, Apple Pay, Tabby, Tamara) and Arabic/English RTL localization. Expert across Node.js, TypeScript, React.js, Next.js, FastAPI, PostgreSQL, MongoDB, Redis, Apache Kafka, BullMQ, and AWS cloud infrastructure. Hands-on Technical Lead skilled in full-stack system architecture, high-throughput event processing (10,000+ active users), and AI integrations (RAG, Google Gemini, OpenAI, Qdrant). Immediately available for UAE/GCC relocation.

EDUCATION

Farook College – University of Calicut

Master of Science, Computer Science (Advanced Research Specialization) – 3.9 CGPA

Mar 2022 – May 2024

Mamo College – University of Calicut

Bachelor of Science, Computer Science – 7.8 CGPA

Mar 2019 – May 2022

WORK EXPERIENCE

WebCastle Media Pvt Ltd

Ernakulam, India

Senior Software Development Engineer II – Team Lead

Jul 2025 – Present

- Lead end-to-end full-stack architecture and system delivery for 5+ enterprise platforms across UAE and international markets in e-commerce, healthcare, logistics, and fintech, managing teams of 8–12 engineers.
- Architected distributed microservices and mobile-first web applications serving 10,000+ concurrent users, defining API boundaries, database indexing, caching strategies, and AWS cloud deployment.
- Engineered asynchronous event-driven pipelines using Apache Kafka, Redis, and BullMQ, reducing task processing latency by over 60% during peak user workloads.
- Automated containerized cloud infrastructure on AWS (ECS, EC2, S3, CloudFront) with Docker and CI/CD pipelines, cutting manual release effort by 70% with zero-downtime deployments.
- Established engineering standards for architecture reviews, production monitoring, incident response, and performance tuning; reduced critical production incidents by 40%.

Software Development Engineer II

Aug 2024 – Jun 2025

- Delivered enterprise fintech platforms supporting thousands of concurrent transactions with Node.js microservices, distributed caching, dynamic React dashboards, and transaction reconciliation.
- Built full-stack AI features including RAG-driven support assistants, semantic search, and recommendation engines using Next.js, Google Gemini, and Qdrant, reducing support resolution time by 50%.
- Streamlined deployment workflows using GitLab CI/CD, Jenkins, and Docker, reducing release build times from several hours to under 15 minutes.

Full Stack Developer

Aug 2022 – Jul 2024

- Developed and delivered 10+ production web platforms for enterprise clients across the UAE and Middle East using React, Next.js, Node.js, Express, and MongoDB.
- Optimized database query execution and backend API response times by up to 45% through query tuning, connection pooling, and multi-layer caching.

Markaz Knowledge City

Calicut, India

Software Development Engineer I (Part-Time / Contract)

May 2022 – Aug 2022

- Built administrative applications and departmental portals using Next.js, Node.js, PHP, MySQL, and AWS for 5+ organizational entities.

KEY PROJECTS (UAE & ENTERPRISE)

Yateem Opticians – UAE E-Commerce & Optical Platform | *UAE Market, Next.js, Node.js, Tabby, Tamara* 2025

- Architected full-stack features for a major UAE optical e-commerce platform, enabling product discovery across luxury eyewear, contact lenses, accessories, and prescription orders.
- Engineered customer commerce workflows including wishlist, store locator, online prescription validation, home try-on booking, and localized customer cart management.
- Integrated UAE payment solutions including Apple Pay, Google Pay, Samsung Pay, Tabby, and Tamara Buy-Now-Pay-Later (BNPL) services.
- Built optical insurance eligibility verification workflows for UAE health insurance providers and policy claims.

Laundry Hub – Multi-Tenant Logistics Platform (UAE) | *Next.js, Express, MongoDB, PayTabs, RTL/Arabic* 2024

- Architected a multi-tenant logistics platform across UAE cities, delivering bilingual Arabic/English interfaces with full RTL layout support, Redux Toolkit, and TanStack Query.
- Engineered automated geospatial driver dispatch and delivery zone management using Turf.js and MongoDB geospatial indexes, cutting assignment latency by 40%.
- Integrated Socket.IO for real-time driver tracking and live status alerts alongside PayTabs regional payment processing.

Muthoot Exim – Digital Gold Platform | *Bun, Next.js, Node.js, Prisma, MariaDB, Kafka, BullMQ, Qdrant* 2025

- Architected a digital gold transaction platform handling purchases, vault redemptions, and ERP ledger synchronization.
- Built a TypeScript monorepo using Bun, Next.js, and Express with Kafka and BullMQ event queues, processing 50,000+ daily financial transactions.
- Embedded an AI support bot (Google Gemini + Qdrant vector search), automating 60% of customer support inquiries.

Talkiyo – Real-Time Communication Platform | *TypeScript, Express, MongoDB, Agora RTC, Socket.IO, Redis* 2025

- Engineered a high-concurrency web app supporting 2,000+ simultaneous audio/video calls with pay-per-minute billing and double-entry wallet reconciliation over 100,000+ transactions.

Muthoot Capital Loan Assistant – RAG Fintech Assistant | *FastAPI, Qdrant, OpenAPI, BullMQ, PostgreSQL* 2026

- Developed a full-stack RAG loan/KYC support platform with real-time streaming, PII redaction, prompt injection guardrails, and RAGAS quality evaluation.

TECHNICAL SKILLS

Languages: JavaScript (ES6+), TypeScript, Python, SQL

Frontend Development: React.js, Next.js, Angular, Redux Toolkit, Zustand, HTML5, CSS3, Tailwind CSS, TanStack Query, Progressive Web Apps (PWA), WebSockets, Socket.IO, RTL & Multilingual UI Development, Mobile-First

Backend & Microservices: Node.js, Express.js, Bun, FastAPI, RESTful APIs, GraphQL, Microservices Architecture, Event-Driven Architecture, JWT, OAuth 2.0, API Optimization

Databases & Storage: PostgreSQL, MongoDB, MySQL, MariaDB, DynamoDB, Redis, Redis Pub/Sub, Elasticsearch, Qdrant (Vector DB), Prisma ORM, Mongoose, Connection Pooling, Indexing

Distributed Messaging: Apache Kafka, BullMQ, Message Queues, Asynchronous Task Processing, Distributed Caching, High-Concurrency Systems (10,000+ Users)

Cloud & DevOps: AWS (EC2, ECS, ECR, S3, CloudFront, RDS, ElastiCache, Lambda, SQS, CloudWatch), Docker, Containerization, GitLab CI/CD, Jenkins, Nginx, DigitalOcean, Linux

UAE / GCC Payment Integrations: PayTabs, Apple Pay, Google Pay, Samsung Pay, Tabby (BNPL), Tamara (BNPL), Razorpay, Cashfree, ERP Integrations, Third-Party APIs, VKYC / KYC Systems, Wallet Ledger Systems

AI & GenAI Systems: Generative AI, Retrieval-Augmented Generation (RAG), Vector Search, Semantic Search, Google Gemini APIs, AI Agents, Multi-Agent Orchestration, Qdrant, RAGAS Evaluation, PII Protection

Testing & Security: K6, Apache JMeter, Jest, Postman, Swagger/OpenAPI, SonarQube, AES-256 Encryption, OWASP Best Practices

Architecture & Leadership: Software Architecture, System Design, Technical Team Leadership (8–12 engineers), Code Reviews, Architecture Reviews, Agile/Scrum Methodologies
